

Your child may have been exposed to:

Cytomegalovirus (CMV)

If you think your child has CMV:

If you think your child has CMV

Tell your childcare provider or call the school.

Need to stay home?

No

Prevention

- Wash hands after using the toilet, changing diapers and before preparing or eating food. Your child may need assistance with washing their hands.
- Clean and disinfect any objects that come in contact with urine or saliva. Use products that kill germs.
- **DO NOT** have mouth contact with items contaminated with saliva

Cytomegalovirus (CMV) is a viral infection common in children.

Symptoms

Most people have no symptoms. Very rarely, a person may develop symptoms. These symptoms include fever, sore throat, tiredness and swollen glands.

Spread

By touching saliva or urine.

Contagious Period

Virus may be active in urine and saliva for a long period of time. Once a person is infected, the virus is shed intermittently in the urine and saliva for the rest of that person's life.

Call your Healthcare Provider

- If anyone in your home has symptoms of CMV.
